

OH720, OP720, HI720, HI722

Cerberus® PRO

Automatic fire detectors

For the automatic addressable detector bus C-NET

- The optimum smoke detector for all applications
- Signal processing with detection algorithms
- Automatic address allocation during commissioning
- Reliable detection of emerging fires
- Suitable for air speeds up to 5 m/s for OH720 and OP720
- Communication via C-NET (individual addressing)

- **Environmental**

- ecologically processing
- recyclable materials
- electronic and synthetic material simply separable

- **Characteristics**

- resistant to environment and interference factors such as dust, fibers, insects, humidity, extreme temperatures, electro-magnetic interference, corrosive vapors, vibration
- insensitive to impact, tamper protection
- protected electronics, high-quality components
- integrated short-circuit isolator, which locate the defective part on the detector bus of the control unit and insulates between 2 detectors
- built-in alarm indicator (AI), visible at 360°
- up to 2 external alarm indicators of type FDAI91/FDAI92/FDAI93 connectable per detector
- signal processing with detection algorithms
- automatic address allocation during commissioning
- the same detector base type can be used for each detector type, for surface and recess supply wiring

- **Optional accessories**

- Detector locking device LP720 as protection against theft
- Designation plate FDBZ291
- Detector base seal RS720 for higher protection category
- Micro terminal DBZ1190-AA (0.28 ... 0.5 mm²)
- Connection terminal DBZ1190-AB (1.0 ... 2.5 mm²)
- Sounder base DBS720

OH720 Multi-sensor smoke detector

Multi-sensor smoke detector consist of:

- Detector
- Dust cap to cover the detector for protection against dust during construction work

Function

- works according to the scattered light principle with one sensor, optical forward scattering
- Opto-electronic sampling chamber holds off disturbing extraneous light but optically detects smoke particles
- an additional heat sensor increases the fire detector's immunity to deceptive phenomena
- selectable detection behavior by different parameter sets
- immunity against transient false alarm causes

Application

- for the detection of flaming fires caused by the combustion of liquid and solid matters, as well as smoldering fires
- for reliable fire detection in environments with deceptive phenomena

OP720 Smoke detector

Smoke detector consist of:

- Detector
- Dust cap to cover the detector for protection against dust during construction work

Function

- works according to the scattered light principle with one sensor, optical forward scattering
- Opto-electronic sampling chamber holds off disturbing extraneous light but optimally detects smoke particles
- selectable detection behavior by different parameter sets

Application

- for the detection of smoke-generating flaming and smoldering fires

HI720 Heat detector (static+RoR)

Heat detector consist of:

- Detector
- Dust cap to cover the detector for protection against dust during construction work

Function

- equipped with one heat sensor
- for high requirements
- certain response behavior with slow and fast temperature increases, also by depth temperature
- selectable detection behavior by different parameter sets

Application

- suitable in areas in which occur different environment temperatures
- where high dust or dirt developments or large humidity which can the impact of conventional alarm units to impair

HI722 Heat detector (static)

Heat detector consist of:

- Detector
- Dust cap to cover the detector for protection against dust during construction work

Function

- equipped with one heat sensor
- measures the ambient temperature, when the maximum temperature is exceeded the detector sends a danger signal to the fire control panel

Application

- suitable in areas, in which temporary high variations in temperature arise
- where high dirt and heat fluctuation which can the impact of conventional alarm units to impair

Detector bases DB721

Function

- Universal base for all point detectors of the series Cerberus PRO FD720

Application

- for recess supply wiring
- for surface supply wiring, cable diameter up to 8 mm

By using a detector base with loop contact (DB721) the detector line is not interrupted even if no point detector is mounted.

Detector base DB722

Function

- Universal base with detector base seal and screwless terminals for the OP720 and OH720 point detectors of the series Cerberus PRO FD720

Application

- for recess supply wiring
- for surface supply wiring, cable diameter up to 8 mm

Base attachment BA720

Application

- For the supply of surface-mounted tubes (max. 20 mm) and trunking (max. 25 mm x 15 mm)
- The detector is fixed with a spring-loaded catch.

● **Simple installation**

- Universal base with
 - 2 break outs on the side for surface supply wiring at max. Ø8 mm
 - extra large rear opening for easy recess supply wiring
- extra-large mounting slots facilitate a re-use of existing drill holes resulting from other systems
- connecting terminals for cable diameter at 1.6 mm²
- place for auxiliary terminals 2x DBZ1190-AA and 2x DBZ1190-AB
- detector can be easily turned into the base by hand, or with the detector exchanger DX791

Place for auxiliary terminals DBZ1190-AA, DBZ1190-AB

Connecting terminals detector line and ext. AI

Opening for cable entry AI

Connecting terminals detector line and ext. AI

Mounting slots min. 40 mm up to max. 90 mm

- alarm indicator (AI) centered in the detector; no alignment required

LP720 Detector locking device

- to protect the detector against theft

FDBZ291 Designation plate

- to identify the location address
- application without detector base seal RS720 only

RS720 Detector base seal

- for higher protection category

DBZ1190-AA Micro terminal, DBZ1190-AB Connection terminal

- for conductors of max. 0.5 mm²

- for conductors of max. 2.5 mm²
- support point for T-branching connection, extern alarm indicators (AI) or cable shielding
- place for max. 2 additional terminals each

DBS720 Sounder base

- the addressable sounder base is used for acoustic alarming
- applicable with all point detectors of the series Cerberus PRO FD720

→ Description see data sheet A6V10203095
